

GAYATHRI SILVA

Cyber Security Undergraduate

PROFESSIONAL PROFILE

Ambitious and driven second-year Cyber Security undergraduate with a strong passion for information security, networking, and emerging technologies. Eager to apply technical and analytical skills in real-world environments while continuously learning and growing in the cybersecurity field. A proactive team player and effective communicator committed to contributing to innovative, secure, and impactful technological solutions.

PROJECTS

Greenhouse Automated Watering System Academic Project (July - Dec 2024)

Tools & Technologies: IoT, Sensors, Microcontroller, Automation Concepts

- Developed an automated irrigation system using soil-moisture sensing
- Implemented sensor-based control logic to reduce water wastage
- Gained hands-on experience in automation and embedded systems

Fitness Management System (DSA & OOP Based Project) Academic Project (Jan - June 2025)

Tools & Technologies: Java, Maven, OOP, DSA (Queue, Insertion Sort), Git & GitHub

- Developed a Java-based system for managing gym members, attendance, and fitness data
- Implemented user authentication and role-based access control
- Applied custom Queue (FIFO) and Insertion Sort to manage membership renewal data

Safari Trip Management System Academic Project (July - Dec 2025)

Tools & Technologies: Java, OOP, Database, Web Development

- Built a trip booking and customer management system
- Implemented authentication, reservations, and scheduling modules
- Designed a database-driven, modular OOP architecture in a team environment

Data Preprocessing, EDA & Visualization Academic Project (July - Dec 2025)

Tools & Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

- Performed data cleaning, preprocessing, and feature handling
- Conducted Exploratory Data Analysis (EDA) to identify patterns and anomalies
- Created visualizations to support insights and decision-making

Secure TCP Application Server Network Programming Individual Project (Jan - June 2026)

Tools & Technologies: C, Python, TCP Sockets, Linux, Multiprocessing, Git

- Developed a multiprocess TCP server in C using socket() and fork()
- Designed a custom protocol with secure authentication and session tokens
- Implemented security controls, audit logging, and a Python client for testing

EDUCATION

Undergraduate BSc (Hons) in Cyber Security

Sri Lanka Institute of Information Technology (SLIIT)

2024 - Present

G.C.E A/L in Physical Science

Senarath Paranavithana National College

2020 - 2023

G.C.E O/L

Senarath Paranavithana National College

2018 - 2019

SKILLS

Soft Skills

- Problem-Solving
- Time Management
- Leadership
- Teamwork
- Verbal & Written Communication
- Analytical Skills

Technical Skills

- Java
- Python
- TCP/IP
- HTML
- OOP
- Git
- Ubuntu
- Linux
- Jupyter Notebook
- Socket Programming
- C
- SQL
- VS Code
- IntelliJ IDEA

CURRICULAR ACTIVITY

- 2020 - 2022 Senior prefect (National College)
- 2018 - 3rd place in Educational zone mathematics quiz competition
- 2018-Leadership skills development camp
